EDUCATION

BSc Computer Science

University of Westminster | London, UK

September 2023 - Expected June 2027

- Relevant Courses: Software Development I & II, Web Design & Development, Mathematics for Computing, Machine Learning & Data Mining, Computer Systems Fundamentals, Algorithms: Theory Design and Implementation, Client-Server Architecture, Database Systems.
- Predicted to graduate with **First Class (1st)**.

Full Stack Software Development Certification (12 months)

January 2022 - January 2023

Code Institute | Dublin, Ireland Remote

- Industry-aligned certification covering all skills and knowledge required for a junior full-stack developer.
- Covering projects in web development, Machine learning, data management and processing, UX/UI, and design.

EXPERIENCE

Software Engineer Placement

September 2025 - June 2026

BT Group | London, UK

- Collaborated with product owners and business teams to deliver digital solutions that enhanced customer journeys and increased adoption of self-service platforms.
- Implemented cloud-based solutions (Azure) to modernize legacy applications, improving scalability.
- Optimized application performance through continuous testing, debugging, and refactoring, reducing system downtime and increasing application reliability through proactive monitoring.

Data Analyst Intern

July - August 2024

Smart Zebra App | Astana, Kazakhstan

- Integrated Mixpanel and Google Analytics, enabling more effective tracking for ad campaign sales growth.
- Enhanced Mixpanel's API integration to improve data accuracy and optimize event tracking in mobile app development.
- Collaborated closely with founders to ensure seamless implementation of analytics tools, improving overall website performance and user engagement.

PROJECTS

Breast Cancer Mortality & Survival Prediction Model | Google Colab

Developed predictive machine learning models to forecast mortality status and survival periods for breast cancer patients.

- Designed robust classification (Logistic Regression, Naïve Bayes, KNN) and regression (Decision Trees) models tailored to assist clinicians in treatment planning.
- Delivered comprehensive analysis reports and clear visualizations to enhance clinical decision-making.

SKILLS AND AWARDS

Certifications: Google Advanced Data Analytics, AI-900: Azure AI Fundamentals

Coding Languages: Python (advanced), Java (Intermediate), SQL (Advanced), C++ (Intermediate), Scikit-Learn (Advanced), Pandas (Advanced)

Software Tools: BigQuery, Tableau, Various Generative AI, Google Sheets, Microsoft Office.

Languages: English (Native), Italian (Native), Spanish (Intermediate), Russian (Beginner).

VOLUNTEER EXPERIENCE

Provided emergency first aid at high-profile public events, including the London Marathon and Chelsea FC matches, as a certified St John Ambulance First Aider.
