PROFILE

Full-stack software engineer and data enthusiast currently completing a Computer Science degree at the University of Westminster (predicted First Class). I have shipped production code at a FTSE 100 company, built analytics pipelines that directly influenced product decisions, and developed machine learning models to solve real clinical problems. I write clean, tested code, ask the right questions, and move fast without breaking things.

EXPERIENCE

Software Engineer

BT Group · London, UK | Sep 2025 – Jun 2026

- Delivered features across BT's customer self-service platform in cross-functional Agile squads with Product Owners and UX designers.
- Migrated two legacy services to ServiceNow, cutting manual deployment steps by ~60% and shipping cadence from fortnightly to weekly.
- Grew automated test coverage from ~45% to ~75%, directly reducing quarterly regression bugs; built ServiceNow dashboards for proactive incident detection.

Web Analyst

Smart Zebra App · Astana, Kazakhstan | Jul – Aug 2024

- Instrumented Mixpanel and Google Analytics from scratch, delivering the first data-driven view of the user acquisition funnel.
- Fixed API integration bugs improving tracking accuracy by ~30%; presented weekly reports to founders, identifying two drop-off points. UX changes lifted estimated Day-7 retention by 15%.

PROJECTS

Breast Cancer Mortality & Survival Prediction · Python, Scikit-Learn, Pandas

University of Westminster | 2024

- Built and evaluated Logistic Regression, Naïve Bayes, KNN and Decision Tree models on clinical datasets to predict patient mortality and survival duration.
- Achieved 87% classification accuracy; applied SMOTE oversampling and k-fold cross-validation to handle class imbalance and prevent overfitting.
- Delivered visualisation report and clinical analysis tailored for non-technical medical stakeholders to support treatment planning.

EDUCATION

BSc Computer Science — Predicted First Class Honours

University of Westminster · London, UK | Sep 2023 – May 2027

- Key modules: Machine Learning, Data Mining, Algorithms & Data Structures, Software Engineering, Database Systems.

Full Stack Software Development Certificate (12 months)

Code Institute · Dublin, Ireland | Jan 2022 – Jan 2023

- Industry-aligned programme covering full-stack web dev, UX/UI, ML fundamentals, and data management; graded against junior developer standards.

SKILLS & CERTIFICATIONS

Languages	Python (advanced) · Java · C++ · SQL (advanced)
Libraries	Scikit-Learn · Pandas · NumPy · React · Django
Cloud & Tooling	AWS · BigQuery · Tableau · Excel
Certifications	Google Advanced Data Analytics · AI-900: Azure AI Fundamentals
Spoken Languages	English (native) · Italian (native) · Spanish (intermediate)
